Subject: Welcome to the Flow Academy
Attachments: 2018 Hyd Alt Course Overview.docx

Jamal, Margaret, Joe, Jerrett, and Patrick,

Welcome as the first group to participate in this newly created short-course on the Clean Water Act and Hydrologic Alteration. We've put the course together in order to give you a holistic overview of how to address hydrologic alteration under the Clean Water Act. Attached you will find a course overview which we've designed to be interactive, with a mix of presentations and discussions, as well as homework assignments where you will work through real issues that have come in front of us over the past 8 years. **Take a look at the class dates on page 2 and let me know if you have any conflicts.**

Following this email, you will each get a fresh link to the Flow Work Group Sharepoint Site. We'll be adding all of the materials for the course directly onto the site. Michele, Rosemary and I are really looking forward to working with you over the next few months! Let any of us know if you have any questions before we get started.

Lisa G.
